

The All-in-One Labelling System

Codaprint

At last...Codaprint -TRIM® Interface is now available!

TRIM® Context Interface is a time-saving program that enables TRIM® users to print colour coded labels using Codaprint directly - without the need to export records from TRIM® and import them into Codaprint.

This program is very simple to add to the TRIM® application as an external tool, or it can be used as a stand alone application that connects to a TRIM® database.

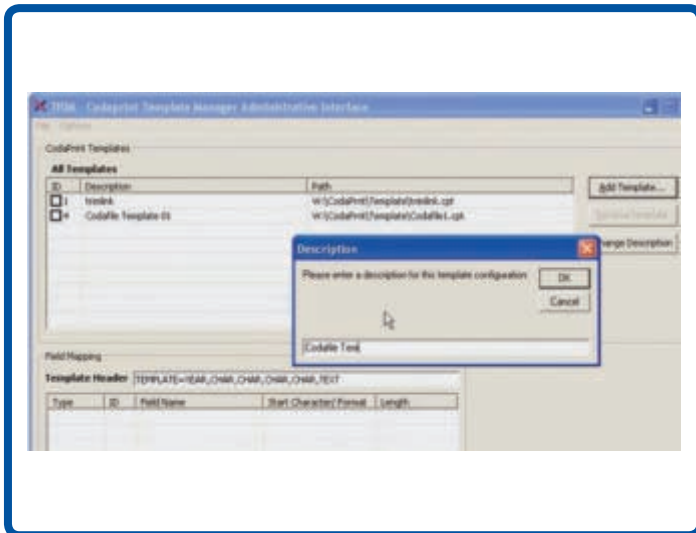

The application comes in two modules: Template Manager and Select and Print. The Template Manager module is for TRIM® administrators to setup or map templates to TRIM® data fields. The Select and Print module is for printing colour coded labels directly from a TRIM® database to a Codaprint application.

The application comes with step by step guide that enables TRIM® administrators to setup the interface in less than 10 minutes.

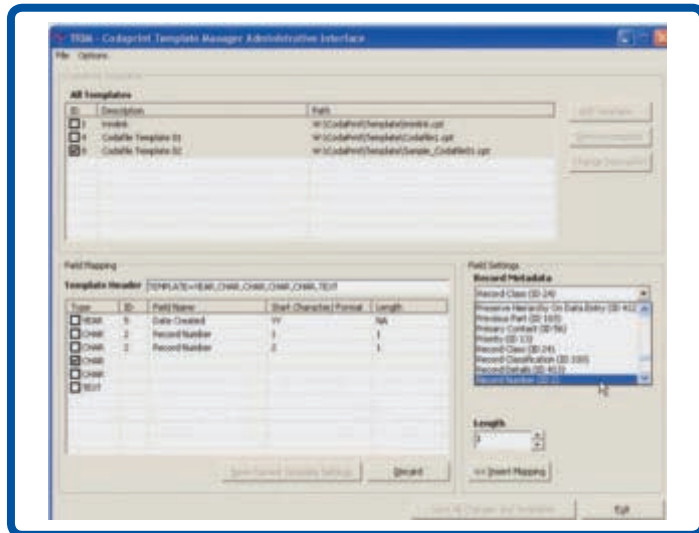

Codaprint is the most popular program used across Australasia to print colour coded labels. Easy to use, Codaprint is ideal for On Demand printing. There's no need to stick individual labels to your files. Codaprint is available for either single user desktop or multi user network installation.

With the new TRIM® Context Interface, its now so much easier and more efficient for TRIM® and Codaprint users to print colour coded labels for files and folders.

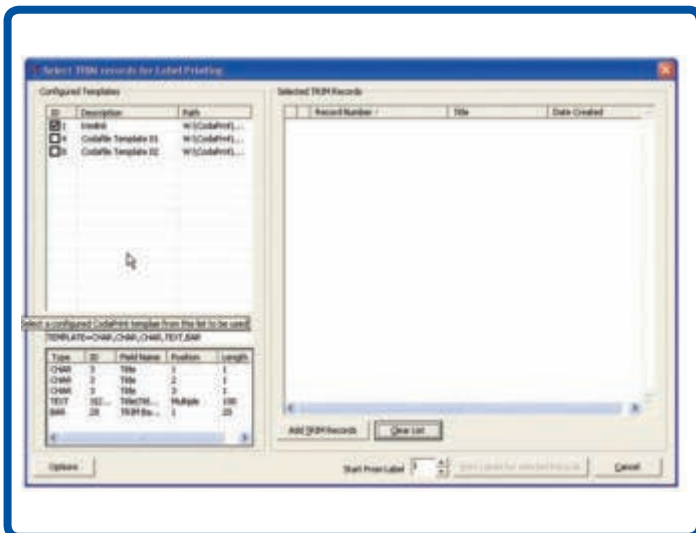

See our step by step instructions on the reverse side.

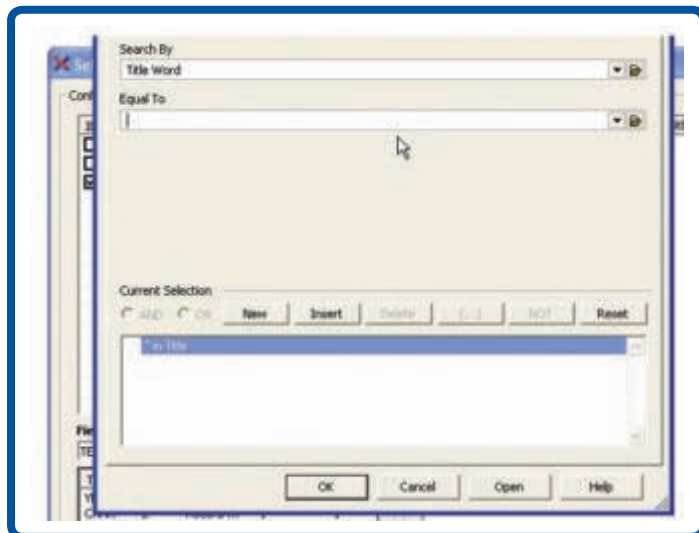

1. From the TRIM® Template Manager, select “Add template”
Give a description (name) to the template

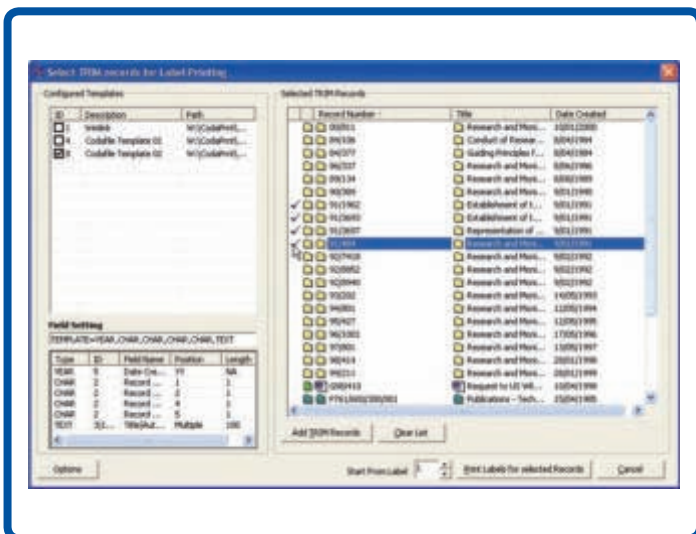

2. Map (link) each item on the template such as colour code, year code and text lines to TRIM® data field

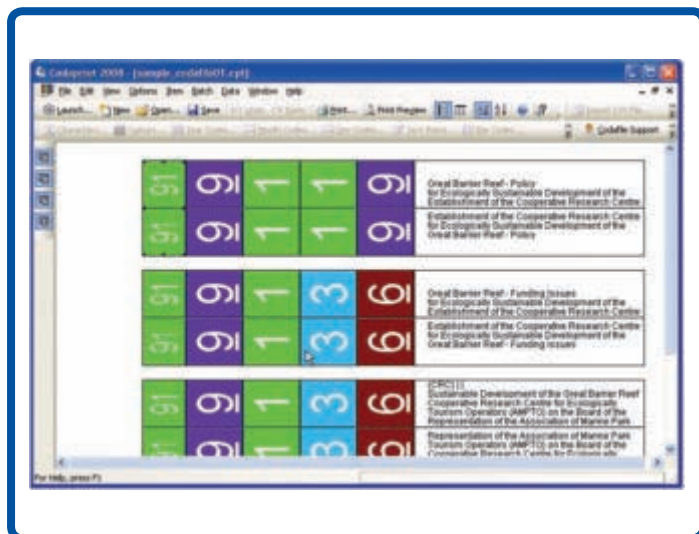

3. To print colour labels, select a Codaprint label from available list of templates

4. Search for TRIM® records to print colour labels

5. Select the records

6. Print colour labels

Recommended System Requirement to run Codaprint:

- Computer with a 600MHz or faster processor
- Windows 7, XP & Vista operating systems
- Compatible with Citrix
- 256MB of RAM or more
- 100MB of available hard-disk space
- DVD-ROM or CD-ROM drive or current internet connection
